

2017 QUARTER I, II AND III OPERATING REPORT FOR THE PROGRAMME "EDUCATIONAL PROJECTS WITH CULTURAL CONTENT"

In 2014, the foundation established a new programme "Educational Projects with Cultural Content", whose objective is to nurture public understanding and awareness of contemporary art, as well as its content and form. With the help of the programme, interest is generated among kids and adults in art as a captivating and stimulating environment for development. Support is provided for the organisation of educational events, e.g. games, lectures and masterclasses, which encourage creative thinking among participants.

This year, we continue to support creative projects that serve to generate interest in contemporary art. The array of projects to receive support includes a conference and lecture cycle for industry professionals and the general public. Exhibitions include captivating educational programmes for kids and adolescents of various ages. Students in creative fields have the opportunity to nurture their skills, collaborating in joint masterclasses with specialists in various disciplines, integrating stories of their respective experience into one another's works. This year, we also congratulated Latvia's most selfless librarians who are adept at stimulating the interest of children and adults in the joy of reading and learning. Overall, to date, we have supported 17 projects within this programme, investing a total sum of EUR 63 973 and will continue to support the development of this programme in Latvia in future. The report on the results of our work is updated once every quarter.
